

SecureComm 2009

The 5th International ICST Conference on Security and
Privacy in Communication Networks
14-18 September 2009, Athens, Greece

www.securecomm.org

Sponsors

Sponsored by ICST.

Technically co-sponsored by CREATE-NET.

Steering Committee

Prof. Imrich Chlamtac (Chair), CREATE-NET,
Italy
Prof. Krishna Sivalingam (Co-Chair), University
of Maryland, Baltimore County, USA

Organizing Committee

General Chair

Peng Liu, Penn State University, USA

TPC Chair

Yan Chen, Northwestern University, USA
Tassos Dimitriou Athens Information
Technology, Greece

Publicity Chair

Z. Morley Mao University of Michigan, USA

Publication Chair

Jianying Zhou Institute for Infocomm Research,
Singapore

Sponsorship Chair

Effie Makri Institute of Informatics and
Telecommunications "Demokritos", Greece

Workshop Chair

Reza Curtmola NJIT, USA

Conference Coordinator

Gergely Nagy, ICST

CALL FOR PARTICIPATION

The 2009 International Conference on Security and Privacy in Communication Networks will take place September 14-18, 2009 in Athens, Greece.

We invite you to participate in this annual conference where new exciting ideas are presented and lively discussed.

At SecureComm, we have security and privacy experts from academia, industry and government, together with standards developers and policy makers. It is a venue for learning the state-of-the-art in security and privacy research area.

Presentations reporting on cutting-edge research results are supplemented and strongly feedbacks are received. Papers present the advances in the theory, system design, building and implementation, and empirical evaluation of secure systems.

We also have invited talks on timely and important topics by excellent researchers.

For more information regarding the conference, please visit <http://www.securecomm.org> or contact one of the Chairs listed at http://www.securecomm.org/org_committees.shtml.

Topics

SecureComm is seeking topics in the board area in computer security and electronic privacy. Topics of interests include, but are not limited to, the following:

- Security & Privacy in Wired, Wireless, Mobile, Hybrid, Sensor, Ad Hoc networks
- Network Intrusion Detection and Prevention, Firewalls, Packet Filters
- Malware and botnets
- Communication Privacy and Anonymity
- Distributed denial of service
- Public Key Infrastructures, key management, credentials
- Web security
- Secure Routing, Naming/Addressing, Network Management
- Security & Privacy in Pervasive and Ubiquitous

Website Coordinator
Kun Bai Penn State University, USA

Security Start-up Competition Events

To find out more about the start-up competition events visit

<http://www.globalsecuritychallenge.com/>

Location / Venue

SecureCom 2009 has reserved a block of rooms at Amarilia Hotel, the hotel information is available visit

<http://www.securecomm.org/AMARILIAHOTEL-fact-sheet.pdf>.

Computing, e.g., RFIDs

- Security & Privacy for emerging technologies: VoIP, peer-to-peer and overlay network systems, Web 2.0

Workshops

SEWCN, 2009 is the first ICST International Workshop on Security in Emerging Wireless Communication and Networking Systems

This workshop focuses on new and controversial ideas in wireless communication and network systems. More information about SEWCN 2009 can be found at <http://sewcn.org>.

Technical Program

The technical program of the conference can be found here: <http://www.securecomm.org/paperlist.shtml>.

Interesting papers include, but not limited to, the following:

Towards Self-Organized Location Privacy in Mobile Networks

On the Security of Bottleneck Bandwidth Estimation Techniques

Ensemble: Community-based Anomaly Detection for Popular Applications

An Active Global Attack Model for Sensor Source Location Privacy: Analysis and Countermeasures

Multichannel Protocols for User-Friendly and Scalable Initialization of Sensor Networks
